

PRODUCT SHEET

HRR-D12x7 Rim Roller, Dbl Sheave

The **HIS** Rim Roller-Double Sheave Model **HRR-D12X7** is an Edge Roller that comes equipped with two 12-inch diameter Sheaves that are 7-inches wide. The **HRR-D12X7** is designed to guide cable *into* and *out of* vault casings as well as man holes while keeping the cable from coming into contact with the edge or lip of the opening. The simplicity of the design is what makes it unique because the force being applied to the sheaves via the pulling force applied to the cable is the same force that locks the unit in place, so there is no need for special rigging.

Features include:

- Light weight housing made from strong 3/8" thick aluminum H.T. to T-6 Cond.
- Self-Lubricating Bearings and 1" Axles with Zerk Fittings for added lubricating
- Built-in Handles make carrying the 58Lb. Rim Roller less cumbersome.
- **Hi-Vis Red** Powder-Coating make the HRR-D12X7 stand out visually on the jobsite
- Three choices of Sheave types include: Aluminum, Nylatron or Alum/Steel (AS)
- Quick Set-up time

Note: The Alum/Steel Sheave is a three-piece Sheave (Two Aluminum Sides and a Chromalloy Center) that is designed for use with Wire Rope.
