## HIS HRRSTL-18R Rim Roller, 18" Radius

The **HIS 18-inch Radius Rim Roller Model HRRSTL-18R** is a Heavy Duty Rim Roller that is designed to be used on the outside edge of vault castings and man holes while keeping the cable from coming into contact with the edge or lip of the opening. The **HRRSTL-18R** is capable of creating a 120-degree Bend-Angle (depending on how many horizontal rollers are used) and maintaining an 18" minimum bend radius. The low-profile design and the taper of the rollers help to keep the cable centered in the device, and the unit also comes equipped with two vertical guide rollers to prevent the cable from coming out of contact with the horizontal force rollers. The HRRSTL-18R comes standard with three Horizontal Force Rollers which create a 144-degree Bend-Angle. Optionally, you can add 1-2 more Rollers.

### Features include:

- Light weight housing made from strong 3/8" thick aluminum H.T. to T-6 Cond.
- Self-Lubricating Bearings and 1 ¼" Chromalloy Axle's with Zerk Fittings for added lubricating
- Built-in Handles make carrying the Rim Roller less cumbersome.
- **Hi-Vis** Red Powder-Coating make the HRR-18R stand out visually on the jobsite
- Three choices of Rollers types include: Aluminum, Nylatron & Steel, or you can order the unit with different combinations of Rollers. Example: two Steel and two or three Nylatron
- Quick Set-up time

**Note:** When pulling with Wire Rope it is recommended to use Steel and/or Nylatron Rollers. Aluminum is recommended for use with Synthetic Rope only.

*Shown with (5) five Nylatron Rollers*

**HIS Business Manufacturing Company**

*Manufacturers of Equipment for the Electrical and Telecommunications Industries*
